PATENT Elastic Fire and Water Proof CEMENT ROOFING.

THE undersigned is prepared to introduce into use in Temperate W. E. CHILDS & CO'S PATENT FLASTIC FIRE AND WATER-PROOF CEMENT ROOF Rancoad Companies, and the public, to examine it

superiority over other Roofing. Architects and Builders Should not had to examine this Roofing, as it is better and cheaper than any thing in use. The material torms a hard and smooth surface that will resist the action of the atmosphere in every climate. It is impervious to water, clastic, and flexible. It contracts and expands with the changes of the atmosphere, and

will neither evaporate, crack nor rot; and, as to its durability, there is no question.

It is practically imperishable, and will perfectly resist any ordinary external exposure to tire, as is fully and abundantly proven, and we will warrant it water proof. We will engage to put our Roofing on over ordinary good sheatning, old shingles, for and gravel. amany good sheatning, old shingles, tar and gravel, tin, zaic, copper, or iron roots—it making no difference how steep or that they may be—for seven dollars per one hundred square feet; it being far cheaper than any roof of the old style, and we are sure it will give be lt will also be found to be the best thing ever in vented to cover or mend old leaky tin, tar and gravel roofs, or around chimneys, scatties, dormer windows Cement can be put on to last as long as stone, and form a perfect adhesion to any object to which it is applied. Tin Roois can be comented over (and war-ranted not to leak) at two dollars and fifty cents per hundred square feet, which is cheaper and much bet-ter than paint. This Roofing will be found to be the best thing for covering large Roofs where they are ex-posed to fire—such as Steam Mills, Saw Mills, Factories, Railroad Cars, Brbigos, Bepots, Station Houses Steamboat Decks, and in fact every kind of Roof where here is an external exposure from fire. As the Roof burn out without igniting.

**Burn out without igniting.

**Burn Insurance Offices at Cincinnati, and other places where Childs & Co's Cement has been used, insure Buildings with Roots covered with this Cement, at the

perfect, without a joint in it, it presents no chance or fire to communicate, and any light substance will same rates as for those covered with Iron, Copper or 20 The Cement will be furnished to those at a disance with directions for using.

FOR ROOFING. THE subscriber is now prepared to cover roofs of buildings, with a new and better article than ever before known. The public are aware that our Govern-ment has had scientific men experimenting, and that it has been the study of the Architects and Builders, for rears, to discover an article for rooting purposes, that would stand the sudden changes of the weather, and impervious to fire and water, and remain a permaent fixture. As yet, nothing has been attained without costing more than the people wish. The contrac-tion, expansion and rusting of metal roofs, are so great in changeable climates, that they become useless, unless being repaired at great expense yearly. Shingles are not fire proof, and can not be used on flat roofs, and the various Compositions and Cements that have een brought into use for roofing, do not stand the ac-on of the weather, but they run when it is warm, and I snow opening at his establishment, No. 47

Maxeus, March 12, 1857. Mr. W. S. BENNEY — When in Philadelphia, Pa., a few days ago, I called upon Mr. Samuel Slean, the celebrat-ed Architect, and author of the Slean Work on Architecture. I asked his opinion as to the durability, &c. of West's Patent Roof, such as you are using in the city

f Memphis, and he told me that he had no hesitation n saying to me that it is a good and durable roof, and is all that its advocates claim it to be; farther saying that he is using it on a fine building for himself.

F. C. ARMS, Gen'l Supt. Mammis, March 2, 1857. W. S. BENNETT, Esq.—Dear Sir.—The facts within our knowledge of the durability, &c., of West's Galvanic Cement; are these; The building you covered for us last Spring, I am happy to state, has answered our expectations. We can, therefore, recommend it to the public for all roofing purposes; as a light, cheap, fire and water proof roof. It does not get soft and run from the effects of the heat of the sun; nor does it harden and crack from the effects of the cold. Any

persons wishing to know more of this article, can call at our manufactory.

To Whom it may Concern:—This is to certify that
W. S. Bennett covered two roofs for me last Spring
with a composition called West's Patent Galvanic Cenent, one of them was a new deck, the other an old hingle roof, which are giving perfect satisfaction. He iso repaired a domer window, which leaked budly, and had baffled the skill of Carpenters to prevent its leak-ing, which he succeeded in making perfectly tight. I do most cheerfully recommend his mode of rooting to the public, for all rooting purposes, and believe it to be a permanent fixture against fire and water.

Persons of Consumptive Habits, READ THIS! To THE GAFENEERG COMPANY: For the first time in my life I am induced to certify to the truly

wonderful effects of a popular medicine, but in send-ing you the certificate I feel that I am only discharging a duty that I owe to the Griefenberg Company, and more especially to suffering humanity.

About the first of June last, I had a negro man taken with a cough attended with restlessness, spitting of blood, and other dangerous symptoms of consumption. I immediately called in a truly skillful and scientific physician, who told me it was a case of consumption. He treated him for several weeks, but he gradually grew worse. I then had another physician of great reputation in long diseases. He examined him, and also decided it to be a hopeless case of consumption, and said it was useless to spend money in trying to cure him.

that previously promised the Græfenberg Agents here, (Messrs. Wells & Lowell.) that when the dectors gave him up I would try the Græfenberg Consumptive's Balm. I did so and to my agreeable surprise, The Greatest Remedy in the World! the man began to improve after taking only five or six doses. He took only two bettles of the Balm and three bettles of the Græfenberg Sarsaparlia Compound, which cost me the small sum of nine dollars, and to which cost me the small sum of nine dollars, and today I consider him entirely cured. He is worth \$1,200,
and he is doing me good service on the plantation. I
consider him perfectly sound and well as he is fut,
hearty, and strong, without a vestige or sign of disease
left.
